

We Bridge the Learning - Performance Gap

Enhance Quality, Safety, Productivity and Profitability

Rapid **curation** of fully-customizable, contextual, multi-media and multi-lingual content

Gather evidence-backed feedback and valuable algorithm-driven insights to identify and bridge on-the-job **performance** gaps

Enable dispersed workforce to access right quantum of **contextual knowledge**, when and where needed. Collaborate with peers and experts to reinforce understanding

FEATURES

Intuitive interface to curate, digitalize and manage an organization's knowledge assets by mixing and matching media elements and code

All data hosted on a **secure cloud** server hosted by reputed global service provider

Ability to **broadcast** push notifications instantly to user groups and/or the entire user base

Instant end-user access to relevant knowledge through inbuilt QR code scanner and ability to provide **real-time** feedback backed with multi-media evidence

Ability to deploy innovative quizzes that provide insight on **competency gaps**

Enabling workforce to access the right quantum of **contextual knowledge** as and when required and on web and mobile devices

Content provided to end-users can be in any **language**

Offline access for use in remote locations without connectivity

Ability for users to be organized into **groups** and empowered to engage in focussed discussions on specific topics

Provision to **geotag** end-user access locations

Ability to **personalize** the dissemination of knowledge and collection of data to specific individuals and groups

Ability to **designate** specific individuals to curate content in their area of specialization

BENEFITS

A tool to rapidly digitalize vital processes within an organization that have a direct impact on **operational efficiency and profitability**.

A **democratic** content curation platform that gives organizations full control to develop relevant content as required in the workplace

Application of proven **neuroscience principles** to ensure effective deployment and application of knowledge in the workplace

Gather granular data from the ground and derive valuable **insights** to ensure performance and to help initiate improvements

A versatile **plug and play** system that can be instantly deployed

A **communication platform** to rapidly disseminate relevant information to a dispersed workforce

Promotes **community based learning** and facilitates a culture of lifelong learning in the workplace

A solution that can be easily **scaled** up and expanded in scope

Assuring **conformity** of on-the-ground activities to stipulated process

Fully aligned with preferred knowledge acquisition methods of the **modern workforce**

A tool to gradually re-skill and prepare office and desk-less workers to be ready for **jobs of the future**

Precisely identify **human competency gaps** that may be contributory factors to safe, secure and reliable on-the-job performance

USE CASES

 Knowledge Management

 Reinforcement of Learning

 Quality / Conformity / Safety Reporting

 Remote Workforce Management

 Risk Mitigation

 Field Audits and Data Collection

 Productivity & Operational Excellence Initiatives

 Continuing Professional Development

 Sales & Service Training

 Digitalization of Standard Operating Procedures

 Platform for Emergency and Routine Communications

 Electronic Permits and Authorizations
